Subject: software patent article

Dear Sir/Madam,

In response to the study of the economic impact of patentability of computer programs for which you are seeking comments - I have published an article in the European Intellectual Property Review, September 2000, Vol22, issue 9 entitled "Streamlining the Software Development Process through Reuse and Patents", which may be of interest to the Commission.

Regards,  
Annelies Moens  
Associate to Justice Drummond, Federal Court of Australia
